DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Amendment, filed 12/29/04, with respect to claims 1-18 have been fully considered and are persuasive. The rejections of claims 1-18 have been withdrawn.

Reasons for Allowance

2. Claims 1-18 are allowed over the prior art of record.
3. The concept of the invention of the instant application lies in that the back-up support is stored in the same PC or the machine, which can serve the operator. It provides assistance with the applications that are seldom carried out by the operator or that the operator has up to now not yet used. The operator can retrieve the information by himself or herself without having to call the helpdesk, as the Arguments on page 9, lines 14-20 of the Amendment filed on 12/29/04 states.
4. The prior art does not teach nor suggest the combination of "an internal data carrier, an device connected to said central input device, and an output data processing unit; said internal data carrier storing at least one data file for playing back instructions associated with at least one machine element, one machine function, and/or a functional or setting error; and wherein the at least one data file is activatable via said central unit such that, upon activation of the file, the instructions are played back via the output device".

Art Unit: 2622
